2023 Yukon River Salmon Summer Fishery Announcement #14 Subdistrict 5-D Subsistence Fishing Schedule

Districts Affected: Upper Yukon Area

Early Chinook salmon and the first pulse of the run are heading upriver. The 2023 Chinook salmon run appears to be similar in size to 2022 and unlikely to meet escapement goals. Consistent with the preseason management strategy to take a conservative approach this season, subsistence salmon fishing will close. This is intended to protect Chinook salmon stocks while they migrate upriver to their spawning grounds in Alaska and Canada.

Assessment project and management updates will be shared during the weekly YR DFA teleconferences each **Tuesday at 1:00 p.m. (Alaska time). Call in number: 1-800-315-6338, Passcode: 98566#**

Subsistence Management Actions

Gillnets of 4-inch or smaller mesh may be used during salmon fishing closures to target nonsalmon. Fishermen are reminded to set this gear in areas where nonsalmon species are abundant to avoid incidentally harvesting salmon. While any salmon caught in this gear may be kept, if it appears salmon are being targeted with this gear, it could be further restricted.

Subdistrict 5-D Lower (from an ADF&G regulatory marker two miles downstream of Waldron Creek upstream to the Hadweenzic River and all other adjacent tributaries, including the communities of Stevens Village and Beaver):

Subsistence fishing is currently open 24 hours a day, seven days per week with 7.5-inch or smaller mesh gillnets.

Effective 8 p.m. Thursday, June 29, salmon fishing is closed. Fish wheels and gillnets larger than 4-inch are not allowed. Gillnets of 4-inch or smaller mesh may be used to target nonsalmon and are restricted to 60-feet or less in length and must be operated as a set net. Nets should be set near shore.

Dip nets, beach seines, and hook and line gear may be used for nonsalmon species. Chinook salmon must be released alive.

A subsistence permit is required to fish for all species in the portion of Subdistrict 5-D Lower from an ADF&G regulatory marker two miles downstream of Waldron Creek upstream to the mouth of Dall River.

Subdistrict 5-D Middle (from the Hadweenzic River upstream to 22 Mile Slough, including the Porcupine River, all other adjacent tributaries, and the communities of Venetie, Chalkyitsik, Birch Creek and Fort Yukon):

Subsistence fishing is currently open 24 hours a day, seven days per week with 7.5-inch or smaller mesh gillnets.

Effective 8 p.m. Sunday, July 2, salmon fishing is closed. Fish wheels and gillnets larger than 4-inch are not allowed. Gillnets of 4-inch or smaller mesh may be used to target nonsalmon and are restricted to 60-feet or less in length and must be operated as a set net. Nets should be set near shore.

Dip nets, beach seines, and hook and line gear may be used for nonsalmon species. Chinook salmon must be released alive.

Subdistrict 5-D Upper (from 22 Mile Slough to the U.S./Canada border, including all adjacent tributaries and the communities of Circle and Eagle):

Subsistence fishing is currently open 24 hours a day, seven days per week with 7.5-inch or smaller mesh gillnets.

Effective 8 p.m. Tuesday, July 4, salmon fishing is closed. Fish wheels and gillnets larger than 4-inch are not allowed. Gillnets of 4-inch or smaller mesh may be used to target nonsalmon and are restricted to 60-feet or less in length and must be operated as a set net. Nets should be set near shore.

Dip nets, beach seines, and hook and line gear may be used for nonsalmon species. Chinook salmon must be released alive.

A subsistence permit is required to fish for all species from the upstream mouth of 22 Mile Slough to the U.S./Canada border (Figure 1).

Gear types for nonsalmon species include dip net, beach seine, hand line, longline, fyke net, lead, and spear, and during subsistence salmon fishing closures Chinook salmon must be released alive. The area where hook and line gear may be used for subsistence has been extended above the Nulato River, except for District 6 and some closed waters (Figure 2).

Submerged gillnets may be used for subsistence fishing during ice-free months, however submerged nets must have a visible buoy or cluster of floats attached to both ends of the net. All gillnets must be marked with a buoy, float, or keg that has the fisherman's first initial, last name, and address.

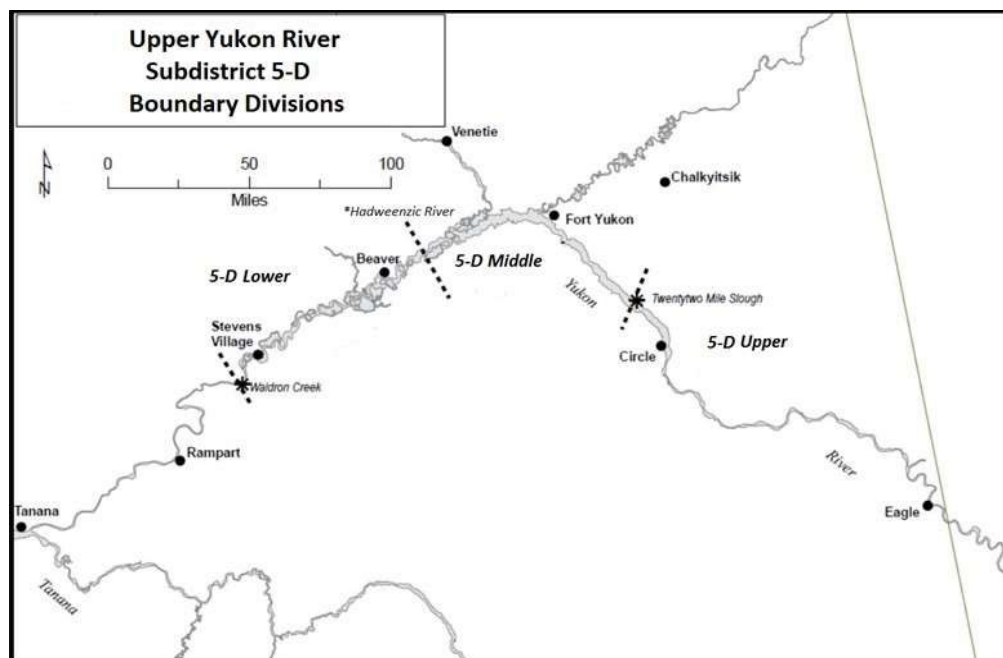

Figure 1. Subdistrict 5-D boundary divisions.

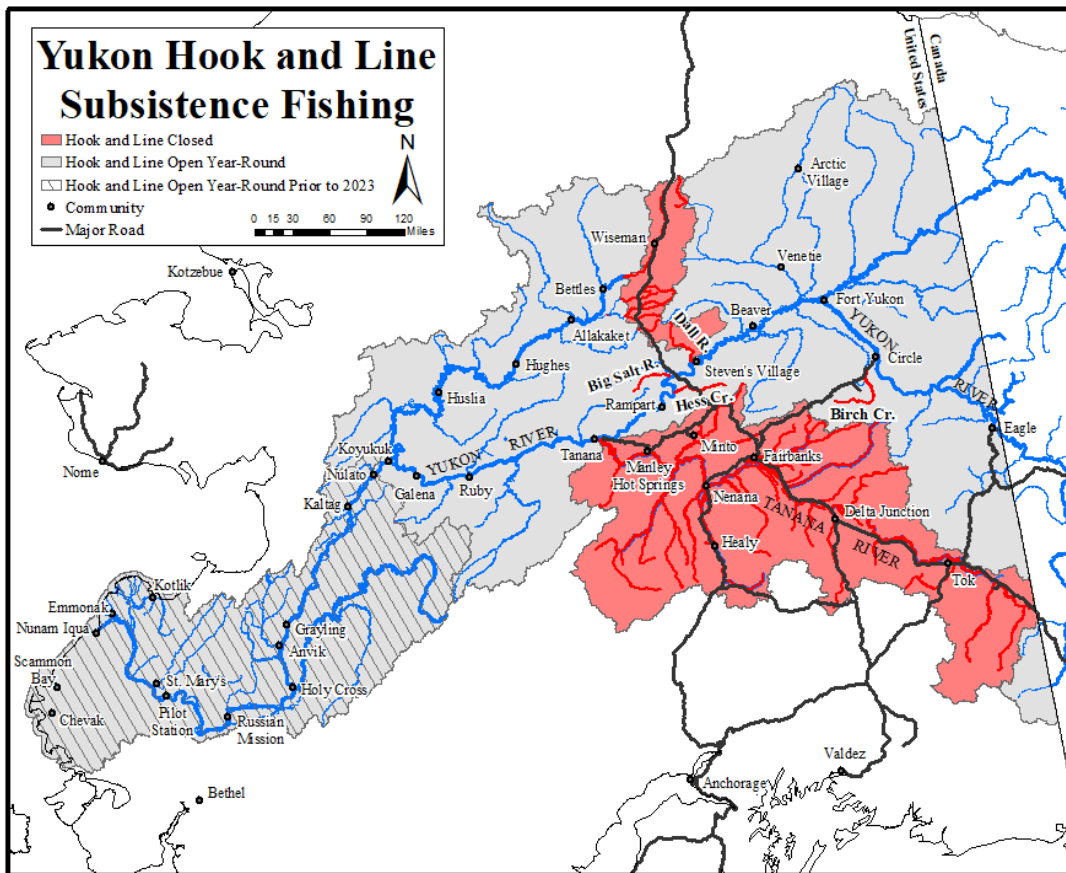

Figure 2. Areas where hook and line are legal as a subsistence fishing gear type in the Yukon Area (gray shaded areas). Closed areas for subsistence fishing with hook and line (red/darker shaded areas) include the Tanana River drainage, Big Salt River, Hess Creek, Dall River drainage, Birch Creek upstream of the Steese Highway bridge, Fish Creek drainage upstream from the mouth of Bonanza Creek, Bonanza Creek drainage, Kanuti River drainage upstream from a point 5 miles downstream of the state highway crossing, and Jim River drainage.

If you are outside the permit area, contact the Fairbanks office at 907-459-7274 for a subsistence harvest calendar.

The ADF&G Emmonak office is open Mondays to Fridays 8 a.m. to 5 p.m., Saturdays 1 p.m. to 5 p.m. (closed Sundays). ADF&G Emmonak office: 1-907-949-1320.

Federal Special Action

The Alaska Department of Fish and Game (ADF&G) and the U.S. Fish and Wildlife Service (USFWS) have coordinated on this advisory announcement. As there is no salmon fishing allowed for Chinook and chum salmon, the Federal manager has not issued any Federal special actions at this time. The Emmonak USFWS office is not open. To reach the USFWS Yukon River Subsistence Fishery Manager, call Holly Carroll at 1-907-351-3029.

This is an announcement by the ADF&G and the USFWS. Federal Special Actions will be posted on www.doi.gov/subsistence/fisheries-special-actions.

ADF&G Advisory Announcements will be posted on www.cfnews.adfg.alaska.gov/ and shared on Facebook at www.facebook.com/YukonRiverFishingADFG.
